

THURSDAY, JULY 25, 1745.

Brussels, July 27.

HIS Royal Highness the Duke of Cumberland, and the Generals Sinclair and Ligonier, who attended him in the Tour he made *incognito* to Antwerp, return'd hither on the 22d, and the Quarters of his Royal Highness were transferr'd the same Day to Saveltheim on the Dike of Louvain, from which, on account of the unwholesome Fogs to which the last-mention'd Place is subject. We have receiv'd the disagreeable News that Oudenard surrender'd on the 11th, after three Days open Trenches. It must be acknowledged, that it was a Place of no great Force; but there are notwithstanding some Reasons why we expected it should have made a somewhat better Defence. As for the Garison, the Dutch Battalion was treated not only with all the Civility, but with all the Complaisance imaginable, and their Words taken that they would not serve against France before the 1st of January, 1747: But as for the two Battalions, Austrians and English, they were made Prisoners of War, conducted to Lille, and very scurvily treated. The Enemy immediately afterwards invested Dendermond. About two Days ago they order'd a Camp to be traced between Halle and St. Renelle. A Rumour again prevails, that the Allies will speedily alter their Situation; and some People here pretend to say, that, in that Case, they will encamp between the Rupel and the Schelde; and that the Duke of Cumberland's Head Quarters will be transferr'd to the Abbey of St. Bernard. They have begun to cut down, by Order of the Generals of the Allies, a considerable Part of the Wood of Soignies, to prevent the Enemy's Grassins from skulking in it, as to this Time they have done. The English Artillery, which till now had continued here, was Yesterday transported to the new Works in that Wood, where it is judg'd it will be of more Service. We hear not a Word of the four Austrian Battalions from Namur; which gives us not a little Uneasiness. The Bishop and Magistrates of Bruges paid their Respects to his Most Christian Majesty on the 19th; and on the 21st that Prelate did Homage, and took an Oath of Fidelity to his new Master. The same Night the King was taken ill, after eating a hearty Supper; he continued much out of Order all the next Day, but is now said to be better. The Household Troops and Guards are advanc'd to Ghent; and if we may credit some private Accounts, his Most Christian Majesty is so much alarm'd at the Return of his Fever, that he is resolv'd, in a Fortnight's Time, to retire to Dunkirk; and, perhaps, will think it expedient to go back again to Versailles, where, it is said, his Presence is much wanted.

Hague, July 31. Several Conferences have been held by the Lords of the Regency with the Marquis de St. Giles, in relation to the Ships lately taken in their Passage from Curasoe; but what the Effect of those Conferences will be, Time only can determine. The States were extremely alarmed at the surprizing News that the Peasants had killed two Engineers, and carried off 25 of their Troops that were appointed to pierce a Dike in the Dutch Flanders. But the Abbe de la Ville having received a Courier with the News from his Court, went immediately to the Grand Pensionary and President of the Week, and informed them, that his Master was determined to protect his new Subjects; meaning, as it is supposed, those Peasants among the rest; but that if their High Mightinesses would give Orders for drawing a Line, which might determine the Extent of their Territory on that Side, strict Orders should be given to his Majesty's Troops to respect their Frontiers; and, in case of Disobedience, the Criminals should be severely punished. It is however certain, that this Declaration, instead of appeasing, has serv'd rather to heighten our Apprehension; and the People especially are so provok'd, that it is scarce possible to restrain them. We learn from Danzaick, that two Swedish Men of War, one of 40 Guns, and the other of 30, are actually put to Sea in Search of Capt. Dagouar; and it is not doubted, that if they come up with him, they will treat him as he deserves; that is, hang him up at Yard-Arm for a Pyrate. According to our last Advices from the Netherlands, Orders have been sent to General Moick to transport himself, and his Hussars, from Ostend, where they are at present, to Antwerp, in order to return from thence to the Army. The same Advices say, that the French have actually marched 10,000 Men towards Ostend; that they are making a

vast Quantity of Fagots; and that, from thence it is conjur'd they are bent upon making some Attempt upon that Place. As yet we have no News from Frankfort in relation to the Grand Duke's Election, except, that great Preparations are making for the publick Entry of the Elector of Mentz into that City on the 2d of August. The Minister of the Elector Palatine at the Dyet, has actually acceded to the Protest made by the Minister of Prussia against restoring the Activity of the Vote of Bohemia; but, perhaps, this may be of no great Consequence; since, if the Treaty now carrying on with his Prussian Majesty should take Effect, that Protest will certainly be withdrawn, and this Election as unanimous as the last.

LONDON.

We learn by some private Letters from the Hague, that the Abbe de la Ville has insinuated that his Master is still inclined to Peace; but that he has been told their High Mightinesses can take no Notice of such vague and general Declarations; and that therefore it is expected whenever his Excellency is really in earnest, he will acquaint them with the Terms, that they may communicate them to their Allies.

They write from Hamburgh, that there are still constant and considerable Remittances made every Six Weeks, or Two Months, to the Northern Courts; and that

some French Emisaries are continually passing and repassing. The same Letters inform us, that Admiral Galloway, in the Russian Service, died lately in that City, after a long and tedious Illness.

According to some Advices received from Ghent, the French King is, or has been, dangerously ill, which occasioned his delaying his publick Entrance into that City; and some of his Physicians have not scrupled to declare, that the Climate of Flanders is not agreeable to his Constitution; so that it is expected he will not long remain with the Army, but put off singing *Te Deum* in Brussels to another Year.

The *St. Philip* Snow, late of London, bound for Buenos Ayres to Cadiz, is taken by Seven Letter of Mark Ships bound to the Leeward Islands and Jamaica, and carried into St. Kitts.

The *Delight*, Waterhouse, for London, two Schooners, and a Sloop, were drove ashore the 13th of May at St. Kitts: 'Tis hoped they all will be got off, but the former will be saved.

The *Diligence*, Lyddell, from Carolina for Cowes, is taken by a French Privateer; the Captain is landed at Plymouth.

The *Dorsetshire*, Bowman, from London and Gibraltar for Virginia, was well about 100 Leagues from the Capes the 23d of June.

The *Charlton*, Holme, from Antigua, arriv'd at Liverpool, spoke with the *Luce* of Bristol the 15th Inst. in the North Channel; who had been out 30 Days from Kingston, Jamaica, and brings Advice, that an Embargo was laid on all Shipping at Jamaica.

Yesterday the Lords Commissioners of the Treasury adjourn'd for Three Weeks.

The same Day the Lords of the Regency sat at the Cockpit, Whitehall, on Affairs of Importance.

Last Tuesday Night the Coroner's Inquest sat on the Body of Anne Jeffs, who was murder'd by one William Jennings, Servant to — Walker, Esq; in Wigmore Row, near Tyburn Road, and brought in their Verdict Wilful Murder.

Yesterday Mr. Peter Lurking, a Tide Waiter belonging to the Custom House, fell over-board from a Ship lying in the River, and was drowned.

The Books of his Majesty's Ship the *Buckingham*, and *Katharine* Yacht, are sent to Chatham, to pay the Wages due to their Companies to the Time of their being remov'd into the Royal George.

Concerning Gleet and Seminal Weaknesses of all Kinds.

ALL judicious Physicians and Surgeons

allow, that nothing is more difficult to cure than Stubborn Gleet and Seminal Weakness, whether occasion'd by too severe purging for Venereal injuries, violent Strains, Pollution sui, or any other Cause whatever; and that they are dangerous in their Consequences, as well as difficult to cure, is as certain, since they exceedingly weaken the Generative Faculties, infect the whole Nervous System, often bring on Hedrick Heats, a Tabes Dorsalis, or Consumption of the Back, or an Atrophy or Nervous Consumption, which frequently terminate in Death itself.

All such, therefore, who have the Misfortune to be troubled with Old or Stubborn Gleet, Seminal Effusions, Involuntary Emissions, excessive Nocturnal Pollutions, or any Weakness of the Kidneys, Ureters, or Bladder, the Diabesis, or Incontinency of Urine, or Difficulty of holding their Water, would doubtless be glad to meet with a certain, safe, and speedy Cure, which they most assuredly may, by taking

only a small Quantity of a transcendent Balsamum Restorative Electuary, now published for a general Good, after having for many Years been experienc'd never once to fail perfectly curing the most Stubborn Gleet known, in a few Days, without Difficulty or Trouble; as also all other Weaknesses of the Back, Reins, Seminal Vessels, and Urinary Passages, which almost instantly cures, bringing to rights and restoring all those Parts and Passages to their natural Tone and pristine Vigour, in a very extraordinary Manner, and by taking a few Doses of it only.

This transcendent BALSAMUM RESTORATIVE ELECTUARY is neither disagreeable to take, nor occasions the least Disorder, but is a wonderful Restorative in all Weakness and Decay of Constitution of any Kind, and particularly strengthens the Back, Reins, Seminal and Urinary Vessels to an immense Degree, inasmuch that in any Debility of them, one Dose of it does more than ten of any other Remedy yet found out; and all Persons fatigued with Gleet or Seminal Weakness of any Sort, or Weaknesses of the Urinary Vessels, who take it, will in three Days time find it so very effectual, that they will be most agreeably surpris'd at it.

When a Medicine will infallibly accomplish such a safe, speedy and perfect Cure of such difficult Maladies, as Gleet and Seminal Weaknesses are, as this Great Remedy truly and directly will, even after all other Means and Medicines have been tried in vain; too much cannot be said in it, and they All who ever took it for any of the above-mention'd Purposes, have readily declared.

The Price is but 6 s. a Pot, altho' for its absolute Efficacy one Pot alone being sufficient in most Cases to accomplish a Cure, worth ten times as much, and by the Author's special Appointment, is to be had only at Mr. Radford's Toy-shop, at the Rose and Crown against St. Clement's Church-Yard in the Strand, ready sealed up, with a Book of Instructions, which whomsoever carefully reads will perfectly know, when the Gleet or Weakness he is afflicted with, succeeds a Venereal Injury, whether all the Malignity of the Foul Disease is intirely eradicated or not.

Note, Ask only for a 6 s. Pot of Balsamum Electuary.
